## Contents

	Acknowledgement.	i
	Study Team.	ii
1	<b>Introduction</b>	<b>1</b>
1.1	Urban Ecosystem.	
1.2	Advantages due to Urban Plants.	
1.3	Places Where Trees & Shrubs are Planted.	
1.4	Choice of Trees.	
1.5	Urban Forests.	
1.6	Nature of Urban stresses affecting health of plants	
1.7	Present Work.	
2	<b>Methods of Work</b>	<b>5</b>
2.1	Sites selected for Study.	
2.2	Tree Species Selected for Study.	
2.3	Parameters of Study.	
2.4	Data collection from other sources	
3	<b>Results</b>	<b>9</b>
4	<b>Discussion</b>	<b>71</b>
4.1	Dust Pollution	
4.2	Air Pollution	
4.3	Insect Infestation	
4.4	Phonological Changes	
4.5	Changes in Canopy Shapes	
4.6	Lead Content of Dust and Leaf Tissue.	
4.7	Experiment for Amelioration of Plant Health in Urban Area.	
4.8	Air monitoring comparison of sites.	
4.9	Pollution and health of trees.	
4.10	Area wise pollution	
4.11	Trees recommended for attracting biota.	
5	<b>Other Urban Stresses</b>	<b>78</b>
5.1	Natural Stresses – Wind and Salinity.	
5.2	Man-made Stresses.	
6	<b>Recommendations</b>	<b>80</b>
6.1	Introduction.	
6.2	Existing Plantation.	
6.3	New Plantation.	
6.4	Specific Cases That Call for Specific Recommendations.	
6.5	Involvement of Society.	
6.6	Criteria for species selection	
6.7	List of plants species recommended	
	<b>References</b>	<b>95</b>

### Acknowledgements

We are grateful to the authorities and officials of MMR, Environment Improvement Society, for giving us opportunity to undertake the investigation of the "Health of Greenery in Brihan Mumbai Area of MMR". We are thankful to Mr. K. L. Velodi, Superintendent of Gardens, Brihan Mumbai Mahanagarpalika, Veer Jijamata Bhosale Udyan, Byculla for granting permission to collect plant samples at various sites.

Thanks are also due to authorities of Maharashtra Pollution Control Board (MPCB) and Air Monitoring Cell of the Brihan Mumbai Municipal Corporation for information about their monitoring stations and air pollution data of some of the centres. Thanks are due to Mr. Kenneth E. Rosario of National Environmental Engineering Research Institute (NEERI), Mumbai Zonal Laboratory, for providing data on Air Pollution. Thanks are also due to the authorities of Civic Training Institute & Research Centre (CTI&RC), Borivali for granting permission to use their library for reference work.

We are thankful to the authorities of Mumbai Meteorological Laboratory, for providing climatic data on weather of this city.

We wish to thank Mr. S. S. Naik, Horticulturist from 'The Leela' Hotel, and their management for permitting us to conduct field experiment on plants under their jurisdiction. We are also thankful to Mr Kedar Gore, for sparing photographs of birds in their habitat.
